

Ahmad Faisal Bani Hamad

Software Engineer | .NET Backend Developer

+962798692428 | ahmad100.fai100@gmail.com | github.com/ahmadfa100 | linkedin.com/in/ahmad-faisal-dev/

Summary

Junior Software Engineer focused on backend and full-stack development with C#, ASP.NET Core, PostgreSQL, Angular, and cloud technologies. Hands-on experience building REST APIs, authentication and authorization flows, database-driven applications, and frontend-backend integrations. Familiar with Machine Learning and Deep Learning workflows using Python and common data/ML libraries through coursework and practical projects, with an interest in integrating AI features into modern web systems.

Education

Jordan University of Science and Technology (JUST)

Bachelor of Software Engineering

2025

GPA: 3.33

Licenses & Certifications

1- AWS Certified Cloud Practitioner, Amazon Web Services (AWS)

Feb 2026 - Feb 2029

2- Fundamentals of Deep Learning, NVIDIA

2026

3- Data Science and Artificial Intelligence, College of Central England - Pioneers

2026

Experience

Full-Stack Web Development Trainee, Orange Academy

Sep 2026 - Present

- Started with HTML, CSS, and JavaScript, covering core frontend concepts through practical exercises and projects.
- Progressed to Angular, completing multiple small and medium-sized projects across the main topics.
- Continued with ASP.NET Core, building backend APIs and integrating them with frontend applications.
- The program culminates in a final full-stack project combining Angular and ASP.NET Core.

Full-Stack Web Development Trainer, Cloud

Jul 2026 - Aug 2026

- Deliver full-stack web development training covering Angular, C#, ASP.NET Core Web API, Entity Framework Core, and PostgreSQL.
- Guide students through frontend-backend integration, REST API development, database access, and practical application workflows.
- Supervise hands-on development of small and medium-sized full-stack projects over a two-month practical development period.
- Prepare technical lectures, coding exercises, and labs while supporting students with debugging, problem solving, and code improvement.

Full Stack ASP.NET Developer Bootcamp, Qualify You

Sep 2025 - Jan 2026

- Contributed to the design and development of an interactive web application using ASP.NET Core Web API and Angular.
- Built and integrated REST API functionality with frontend features and database-backed workflows.
- Worked collaboratively on application features, troubleshooting integration and responsiveness issues.
- Coordinated task delivery with team members during the final phase of the project.

Web Development Trainee, Clever Mind POB

Jun 2024 - Sep 2024

- Developed and modified multiple web projects using HTML, CSS, and JavaScript, applying core frontend development concepts in practical assignments.
- Built a complete web project from planning through implementation and deployment while using technical documentation to support development and troubleshooting.

Selected Projects

AI Daily Developer Journal | Frontend: Angular, HTML, CSS, TypeScript; Backend: ASP.NET Core Web API, Clean Architecture, PostgreSQL; AI: DeepSeek API; Tools: Postman

- Developed an AI-powered journaling platform for developers to record daily learning progress, bugs, solutions, and technical reflections.
- Integrated AI-generated summaries to organize lessons learned, problems faced, solutions, improved skills, and next-day plans.
- Implemented weekly reports, searchable history, and a progress dashboard to track learning consistency and technical growth.

Deep Learning Projects (CNN, RNN, LSTM, GRU) | Python, NumPy, Pandas, Matplotlib, scikit-learn, TensorFlow

- Prepared and cleaned datasets using NumPy and Pandas, handling missing values, inconsistencies, and data-formatting issues.
- Built and trained a CNN model for flower image classification and evaluated training and validation performance.
- Built SimpleRNN, LSTM, and GRU models to explore sequential and time-series prediction tasks.
- Evaluated model behavior using accuracy, loss, and validation metrics, including signs of overfitting.

Lightsek | Frontend: Angular, HTML, CSS, TypeScript; Backend: ASP.NET Core Web API (Clean Architecture), PostgreSQL

- Contributed to a Trello-like full-stack project management platform using Angular and ASP.NET Core Web API.
- Assisted with backend authentication and authorization features, including login, registration, and protected endpoints.
- Worked on board-management APIs and integrated them with frontend pages and components.
- Built and improved Angular UI components while consuming RESTful APIs from the backend.

Bus-Ticket System | Frontend: JSP (JavaServer Pages), HTML, CSS; Backend: Java Servlets (MVC, DAO, design patterns), Apache Tomcat; Database: PostgreSQL

- Built a bus-ticketing platform supporting multiple user roles and discount schemes, with an admin dashboard for ticket creation, editing, deletion, fare calculation, booking, and viewing past trips.

Skills

- **Languages:** C#, Python, C++, SQL, JavaScript, TypeScript, Java, PHP
- **Backend:** .NET / ASP.NET Core, Web API, Entity Framework Core, LINQ, REST APIs, Clean Architecture, Node.JS
- **Frontend:** Angular, HTML, CSS, React
- **Databases:** PostgreSQL, SQL Server
- **Cloud & DevOps:** AWS, Azure, Docker, Git, Linux
- **AI & Data:** NumPy, Pandas, scikit-learn, TensorFlow, Machine Learning, Deep Learning
- **Tools:** Postman, Jupyter, Google Colab
- **Languages:** Arabic: Native, English: Very good

Completed Courses

• Python for Data Science and Machine Learning Bootcamp, Udemy	25 hours	2026
• Fundamentals of Azure, Microsoft Learn	24 hours	2026
• ASP.NET Core (MVC) Development, The Hope International Edu	40 hours	2025
• Full-Stack Web Development (MERN), Udemy	61 hours	2025
• CCNA: Introduction to Networks, Cisco	14 hours	2025
• Coach You, Ministry of Digital Economy & Entrepreneurship	6 months	2025
